

Utilization of Overseas Network

We carefully select counterparts(i.e. wholesalers, agencies) based on thoroughgoing field inspections conducted by professionals who are familiar with needs in the industry and international team. We build and operate business models linked to financial institutions, micro finance managing organizations, moreover, industry supporting corporations and government agencies.

Agricultural support overseas

We pay attention to new natural ingredients in rural communities with low living standard and lack of job opportunities. We try to achieve to strengthen value chain of natural resources such as vegetable oil and herb extract and increase the living standard in the rural communities. To do that, we cooperate with local organizations and enterprises and support the process from the production plan, packaging, to the marketing of the products.
